RESEARCH EXPERIENCE

GAMMA Lab, University of Maryland — College Park, MD USA
Research Assistant (Advisors: **Dinesh Manocha, Aniket Bera**) — *Aug 2019 - Present*

- Developing VR locomotion interfaces, using spatial computing and motion planning with the Oculus Quest, that minimize the chance of collision with physical objects to improve immersion in VR experiences.
- Investigating the efficacy of robust statistical models of human perception that accurately estimate users' thresholds for tolerance of visual gains in VR when only low amounts of data are available.
- Investigated and evaluated techniques for synthesizing and retargeting emotionally expressive gaits for realistic virtual avatars in social VR/AR settings.

DRIVE Lab, Davidson College — Davidson, NC USA
Research Assistant (Advisor: **Tabitha C. Peck**) — *May 2018 - Aug 2019*

- Designed and conducted psychophysical experiments to measure users' tolerance of horizontal visual gains with visual distractions present during locomotion in VR using an HTC Vive.
- Developed a physically-based, haptic buoyancy simulation to render properties of buoyancy under different material properties using Unity and a Novint Falcon controller.
